Software Development

Calgary, Alberta, Canada

SUMMARY

I started my career with an academic background focused on Safety Engineering, complemented with valuable practical experience in leading industrial environments. I progressed significantly, working as a logistics manager in well-known companies. In this role, I honed crucial skills as a national accounts and logistics operations manager, which enhanced my ability to drive operational excellence. In addition, my experience in occupational safety was crucial during the pandemic, applying strict protocols to mitigate risks.

Therefore, my passion for technology and programming has been a constant driver in my career, finding harmony with occupational safety and current technologies. I enjoy creating innovative solutions and facing creative challenges in the development of applications and systems. I am proficient in multiple programming languages and software architecture design. In addition, I am passionate about continuous learning and keeping abreast of the latest technology trends. My focus on teamwork and effective communication allows me to successfully collaborate on multidisciplinary projects. My goal is to continue to grow professionally and contribute to the development of **high-quality** software that improves people's lives and meets market needs.

EXPERIENCE-STUDIES

Software development-southern Alberta of technology (Sait)

At the Southern Alberta Institute of Technology (SAIT) in Canada, I immerse myself in a rigorous curriculum that covers a wide range of topics related to programming, software design, and systems engineering. Throughout my training, I learn various programming languages, such as Java, Python, C++, and JavaScript, while acquiring skills in designing and developing applications for web, mobile, and desktop platforms. In addition, I am taught how to create intuitive and engaging user interfaces through user-centered design and the application of UX/UI principles. The program also includes teaching agile practices such as Scrum and Kanban, as well as fundamental aspects of IT security. In summary, the software development program at SAIT prepares me to become a competent and versatile software developer, equipped with the skills necessary to thrive in today's technology industry.

EXPERIENCE

Warehouse Manager

April 2019 - June 2021

Cartagena de Indias, Bolívar, Colombia

Occupational Health and Hygiene Technologist

March 2018 - November 2018

Cartagena de Indias, Bolívar, Colombia

STUDIES

Software developer, Computer Programming/Programmer.

Suthers Alberta Institute of Technology (SAIT)-Canada

Bachelor of Technology, Occupational Health, and Hygiene.

Fundación Technologic Comfenalco-Colombia

High School Diploma, Occupational Safety and Health Technician.

Institute Sigmund Freud-Colombia
